Our Capabilities: A Closer Look

DIGITAL TRANSFORMATION: Digital technologies enable new ways to deliver value to customers by improving business processes, providing technical domain modernization, and redefining organizational/cultural mindsets, processes, and capabilities.

SCIENCE & ENGINEERING: Axiom provides Science and Engineering support to develop and improve Numerical Weather Modeling and High Performance Computing support, Engineering Services, Logistics and Planning, Air Transportation Support, Maintenance and Repair support for the National Weather Service.

IT OPERATIONS SUPPORT SERVICES: Our IT support services include: IT Asset Management, Operations Support, System Users and Privileges, Software Protocols & Tools, Help Desk Operations, Network and System Administration, Disaster Recovery & Business Continuity, Configuration Management and Shelf Stock for Repair and Replacement.

PROGRAM MANAGEMENT: We support clients, Strategic Planning, Requirements Development, Performance Improvement, Gap Analysis, CPIC Support, Communication and Outreach Support Services.

EMERGING TECHNOLOGIES: Technologies are rapidly changing and becoming essential than ever before and customers are looking for ways to harness them to benefit their organizations. Axiom provides Robotic Process Automation (RPA) implementation and Artificial Intelligence (AI) expertise.

DATA MANAGEMENT, SCIENCE & ANALYTICS: Axiom supports NOAA Data Centers with their Enterprise Data Management Efforts. We provide data stewardship, archiving and metadata support which includes Geographic Information Systems (GIS), database administration, data discovery, access and web portals. We support the build of data analysis algorithms and visualization.

RECORDS & INFORMATION MANAGEMENT (RIM): The Axiom team provides RIM services per NARA guidelines; develops requirements for and assists with the implementation and administration of Enterprise Content Management (ECM) solutions; develops and implements records evaluation programs; and develops file storage processes, SOPs, quality assurance and inventory frameworks for digital and hard copy retrieval.

CLOUD COMPUTING: We offer Cloud Strategy, Migration, Integration & Administration, HPC Cloud Computing, IaaS, PaaS and SaaS, and Cloud ROI Analysis.

STRATEGY AND OPERATIONS: As trusted advisors and partners, we work with senior-level stakeholders across agencies of all sizes to tackle their most pressing and wide-ranging challenges. We help our clients deeply understand the challenges they face and are collaborative partners who ask the difficult questions, bring creative solutions, design strategies, and optimize operations to enable our clients to achieve their missions.

IT SECURITY: Our team excels at Security Operations Center (SOC) Services, Security Control Assessments/Cloud Security Assessments, Cyber Penetration Testing, Secure Coding Reviews and Security Engineering.
